

price sheet no. 19: **desoldering**

(U.S.A.)

The WickGun™ desoldering braid dispenser is a convenient, productive way to desolder. Simple one-handed operation dispenses, positions and cuts off braid. Fingers never touch the braid, so operators stay free of burned fingers and the braid stays free of contaminants.

The WickGun™ braid dispenser uses replaceable and interchangeable cassettes, factory loaded with 4.6 meters of finely woven pure copper braid, coated with a pure rosin flux. The WickGun™ is both ESD safe and RoHS compliant.

Xuron WickGun™ desoldering braid (litze) dispenser (ESD safe)
